

The screenshot displays a logic analyzer interface. On the left, a 'Messages' pane shows four entries for the signal '/tb\_carry\_ge...':

- 00000000000000000000000000000000
- 00010001000100010001000100010001
- 0000000000
- 0

The main area is a timing diagram with a black background and white vertical grid lines. A yellow vertical cursor is positioned at 5400 ps. The x-axis at the bottom is labeled with time values: 4000 ps, 5000 ps, 6000 ps, 7000 ps, 8000 ps, 9000 ps, 10000 ps. The y-axis on the left is labeled 'Now' and 'Cursor 1'. The 'Cursor 1' value is 5400 ps.
